157. INFIDEOS (2021). YouTube Channel
 INFIDEOS' mission is to provide free, high quality, educational resources about Information Science to instructors and students of our field—and beyond—while also innovating and testing novel educational practices and resources suited to a multimedia information age.

Video Series

What Makes This Paper Great?

This in-depth series focuses on landmark papers of Information Science. After a paper is introduced, its origins, context, structure, highlights and ultimate impacts are presented. Each video concludes with reflections on the strengths of the paper; insider stories and references are included.

Websites

202. The Gallery of Information Behaviour Gratitude
This website features expressions of gratitude to scholars of information behaviour within the field of Library and Information Science. In particular, it recognizes and celebrates information behaviour researchers and topics that bring greater depth, breadth, and diversity to the literature and research community. The Gallery draws from an assignment called *Giving Thanks to Information Behaviour*, done by students enrolled in the course, *The Information Experience*, at the Faculty of Information, University of Toronto.
203. Reading Guide to Information Behavior
The objective of the Reading Guide is to help newcomers enter the wonderful literature of information behaviour. In each installment readers are introduced to a key information

resource on information behaviour, such as the Encyclopedia of Library and Information Sciences (ELIS), Annual Review of Information Science and Technology (ARIST), an information behaviour textbook, and an information behaviour handbook. The Reading Guide also includes informative "newsflashes" about important debates and bibliometrics.

204. Welcome to Library and Information Science

This online exhibit is based upon a paper in the *Journal of Education for Library and Information Science* by Jenna Hartel. It enacts the following scenario: At an orientation session for a library and information science (LIS) program an educator gives incoming students a brief address entitled "Welcome to Library and Information Science." Three versions of that talk are offered here, drawn from seminal works by Jesse Shera, Marcia Bates, and Howard White.

205. iSquares

The iSquare website, launched in February 2014, presents arts-informed, visual research into the concept of information using the draw-and-write technique. There is an overview of the iSquare research program, the corpus of 5,000+ iSquares, the iSquare research protocol, educational applications, and more.

206. Jenna Hartel (personal academic website)

This website offers a survey of news, research and publications, teaching, advising, multimedia and interventions related to my work in the field of Library and Information Science.

207. The Serious Leisure Perspective

The Serious Leisure Perspective (SLP) is a website about leisure for academics, students, and other researchers. It includes background information on the SLP (a theoretical framework of leisure), a current bibliography, full text digital library, research instruments, a list of associated scholars and more.

NARRATIVE BIO

I am a theorist, methodologist, and historian of Library and Information Science (LIS), motivated by the questions: *What is the nature of information in the pleasures of life?* My work aims to be an imaginative, energetic, and committed form of intervention in the field of LIS. I believe a different character of LIS is possible, one that moves beyond pragmatic concerns with information resources and technologies to consider positive and upbeat information phenomena across the entire human experience. I have committed myself to promoting that vision through the substance of my research into information within leisure, pleasurable, or profound contexts. To the same end, my ideas are expressed and packaged in non-standard forms of presentation that are playful and accessible to all. I hope to be a catalyst, endeavoring to inspire and encourage the field of LIS to explore new areas, import new methods, break out of traditional boxes in which it conducts its research, and entertain new possibilities.
