Q. Why did the PowerPoint Presentation cross the road?  
A. To get to the other slide.

Q: Why was the cellphone wearing glasses? 
A: It lost its contacts.

We’ll we’ll we’ll...if it isn’t autocorrect.

The library banned drinks after someone poured milk on the serials!

Q. What is the biggest lie in the entire universe? 
A. "I have read and agree to the Terms & Conditions."

Librarian: Knock-Knock 
Student: Who’s there? 
Librarian: Winnie Thupp 
Student: Winnie Thupp who? 
Librarian: He’s in the fiction section, and so is Piglet!
A century ago, Belgian lawyer and bibliographer Paul Otlet created elaborate systems of information organization and access. The diagram above shows his understanding of bibliographic control, that is, the way that ideas make their way into various documentary formats and the card catalogue. Otlet is considered the inventor of the library card catalogue., among other things.

OBSOLETE AND NEW TECHNOLOGIES

Draw a line connecting the obsolete technology on the left and its new technology on the right.
You don’t have to know everything. You just have to know where to find it.

We, as members of an information profession, have an obligation to continue to work to identify issues...[in]...populations that have traditionally been overlooked by our research efforts, professional practice, and the published literature.

A library is a growing organism.

I think it’s very important to get more women into computing. My slogan is: Computing is too important to be left only to men.

The paperless society is about as plausible as the paperless bathroom.

Humankind has not woven the web of life. We are but one thread within it. Whatever we thread to the web, we do to ourselves. All things are bound together.

All things connect.

SECRET MESSAGE _ _ _ _ _ !
Marcia Bates' berrypicking model (1989), at left, cast information seeking as a process with an evolving query in which different kinds of information resources are accessed, in turn. Iterative and dynamic, information seeking is like picking berries in the woods.
AI POETRY

Here are some poems about “information” generated through artificial intelligence.

ODE TO INFORMATION
A Sonnet

Information, you inspire me to write.  
I love the way you help and entertain.  
Invading my mind day and through the night,  
Always dreaming about the thrilling brain.

Let me compare you to a pretender?  
You are more precise, truthful and shocking.  
Right frost nips the robins of December,  
And wintertime has the missed ability of walking.

How do I love you? Let me count the ways.  
I love your uplifting style, wit and charm.  
Thinking of your concise wit fills my days.  
My love for you is the fine wiper arm.

Now I must away with a mocking heart,  
Remember my true words whilst we’re apart.

MELVYL DEWEY’S TORMENT

The Villanelle Of the Information

Dewey couldn’t stop thinking about the Information  
It was just so loveable and illuminating  
But he could never forget the orientation

That morning, Dewey was shocked by the application  
He found himself feeling rather excruciating  
Dewey couldn’t stop thinking about the Information

Later, Dewey was spooked by an aspiration  
He tried to focus on a waiting  
But he could never forget the orientation

Albert Einstein tried to distract him with an aberration  
Said his mind had become too extenuating  
Dewey couldn’t stop thinking about the Information

Dewey took action like an education  
The Information was becoming too fascinating  
But he could never forget the orientation

Dewey nosedived like an illuminating remuneration  
His mind became dangerously debilitating  
Dewey couldn’t stop thinking about the Information  
But he could never forget the orientation
